Looking for ways to cut costs, control spending and increase efficiency and productivity? The answer is right there..on paper. DocuSource helps enterprises of all sizes cut costs, save space, comply with regulations, enhance collaboration, and reduce paper consumption.

DocuSource is a leading provider of document management systems, solutions and services, enabling customers to improve document workflow and increase efficiency while reducing costs. DocuSource integrates enterprise content/document management software and systems, copiers, printers and MFP technologies, to deliver customized solutions that address our customers' critical business requirements.

DocuSource is an independent integrator focused on researching, testing and recommending best-in-class solutions for our customers. We consult with our clients and offer greater objectivity and more choices, since we are not limited to a single manufacturer or brand. In addition, DocuSource provides solutions across the entire document lifecycle – from capture to output to storage/retrieval. We seamlessly integrate document management software and hardware systems to architect comprehensive solutions and serve as a single point of contact for our customer's document technology needs. Our solutions include:

- Equipment Solutions: Copiers, printers and MFPs
- Enterprise Content Management (ECM) Solutions including Automated Workflow, Digital Capture, Process Improvement, Archiving and ERP Integration
- Managed Print Services
- Record Management/Regulatory Compliance/Risk Mitigation

SUCCESS STORIES

BERGELECTRIC

Driven by mounting overtime expenses and an excessive work backlog in the Accounts Payable Department, Bergelectric engaged DocuSource to deliver a comprehensive Enterprise Content Management Solution. DocuSource deployed a solution that provided automation, balanced workloads and a secure, searchable central repository for documents. Berg is realizing cost savings through staff reduction, reduced paper and office supplies, late payment fees and manual errors. Overall, the system has helped Berg reduce departmental costs by 40% and achieve ROI in less than one year.

CITY OF CHINO HILLS

After a competitive bid process, the City of Chino Hills selected DocuSource to replace a disparate, aging and expensive printer and copier infrastructure. DocuSource provided a solution that enabled the city to save over \$60,000 a year from reduced equipment, service and outsourced printing expenses. The new consolidated contract reduces the number of invoices the city has to process each month from over a dozen to two, centralizes the supply chain and provides the city with complete visibility and reporting to assess costs and usage on a regular basis.
